

ABSTRACT

Systems and methods are provided to facilitate lottery ticket transactions. A request to purchase a lottery ticket is received, the lottery ticket being associated with a lottery number combination, such as a limited number of lottery tickets or a limited number of players. An indication that the lottery number combination is to be associated with a limited number of occurrences is also received. For example, an indication that the lottery number combination is to be associated with only a single lottery ticket may be received. A price associated with the lottery ticket is determined based on the received indication. According to one embodiment, the price is increased by a predetermined amount based on the received indication.
